Utah should become the richest of all States in the Union, as she has more natural resources than any other State in the Union. The mountains give

forth minerals of all descriptions-gold, silver, lead, copper, coal, soda, sulphur, salt, asphalt, elaterite, gilsonite, asbestos and any kind of building stone and clay for making the finest of brick of different colors. There is no State which has richer valleys, and that will produce more grain to the acre than in our State of Utah. Here in the valleys, below the snowclad peaks, we raise peaches, pears,

apricots, plums, prunes, cherries, strawberries, and all kinds of small fruits. The sugar beet thrives well and the sugar output last year amounted to 60,000,000 pounds. Wheat, barley, oatsa nd. lucern grow to perfection and

In addition to the agricultural and mineral resources of Utah, she has an Italian climate which makes her the greatest natural sanitarium in America. Southern Utah has a climate similar to southern California, while Salt Lake City, the capitol and largest city, fourteen miles from Great Salt Lake, with an elevation of 4,200 feet, has canyon and lake breezes which temper the summer heat and make the climate the year around most delightful.

Besides having such a delightful climate, Salt Lake City is an educational center and a city of homes, and with her wonderful resources—mining, manufacturing, agricultural, health and pleasure resorts—and being centrally located in this intermountain country, with three new railroads now building to the city she will be one of the largest railroad centers in this Western country, and a great metropolis with a population of 150,000 by 1907.

The future has never looked so bright for Salt Lake City.
